Art Unit: 1732

1.Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 21-30, drawn to a method for making an elastomeric article, classified in class 264, subclass 305.
- II. Claim 31, drawn to a glove, classified in class 2, subclass 161.6.

The inventions are distinct, each from the other because:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the glove as claimed can be made by other processes than the instant, such as one involving additional dip coatings around the fingertips only to make a puncture-resistant glove.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

2.Comments concerning applicant's response of September 9, 2005 will be held in abeyance pending an election.
